

CSM at Clinton Global Initiative

2-3 December 2008

Hong Kong

CSM Programme Manager, Viva Kermani, attended the Clinton Global Initiative's first ever regional conference in Hong Kong. With the growth in Asia, there is expanding capacity of leaders to address current challenges at local and regional level. With the goal to transform and strengthen the responsibilities of corporations, governments, and non governmental organizations, the event was focused on achieving positive impact and benefits through partnerships.

At this event, CSM was well poised to make a commitment in the area of Climate Change. The "**10 Million Indians say 'Yes, We Can' at CoP15 commitment**" aims at reaching out to more than 10 million Indians – both in India as well as across the Indian Diaspora, specifically in countries such as the UK and USA – with an invitation to take a pro-active pledge on climate action.
